

Western Plains Petroleum Ltd.

Western Plains Petroleum Lloydminster Production Update

For Immediate Release

November 4, 2009

CALGARY, ALBERTA – Western Plains Petroleum Ltd. (TSXV:WPP) (“**Western Plains**” or the “**Company**”) announces that it has reactivated one of the two shut-in wells located on oil and gas interests recently purchased by the Company in the Lloydminster area of eastern Alberta (lsds 11, 12 and 13 of 12-05-03 W4M). The reactivated well (located on 13-12) is currently producing approximately 25 barrels of heavy oil per day, increasing the Company’s overall production to approximately 130 barrels of heavy oil per day. The Company previously announced the purchase of a 100% working interest in these oil and gas assets on October 2, 2009.

The Company is planning re-entry and reactivation activities on the 2nd shut-in well (also located on 13-12) in November 2009, and on an abandoned well (located on 11-12) in December 2009. Based on production data from adjacent producing properties, the Company is anticipating that heavy oil production from reactivating these two wells to be similar to that of the recently re-activated 13-12 well.

The Company also confirms it is not proceeding with the previously announced private placement of up to 9,375,000 common shares at a price of \$0.08 per share for gross proceeds of up to \$750,000. The Company was proposing to use a portion of the net proceeds from such private placement in connection with an offer to acquire certain oil and gas interests located in the Lloydminster area of eastern Alberta. The opportunity to make a bid for these interests did not materialize as anticipated, and the Company determined not to proceed with the private placement offering. The Company has been funding its acquisition of addition heavy oil interests from cash flow. Depending on market conditions, and the opportunities to acquire low risk, heavy oil assets in Alberta and Saskatchewan, it may consider raising additional capital through private placement offerings in the future, subject to the policies and procedures of the TSX Venture Exchange.

About Western Plains Petroleum Ltd.

Western Plains is a Lloydminster, Alberta, based junior heavy oil producer with interests located in the Lloydminster area in both Saskatchewan and Alberta. The common shares of the Company trade on the TSX Venture Exchange under the symbol WPP.
